FOR IMMEDIATE RELEASE

Primeau Consulting Group announces Information Governance Assessment and Consulting Services

Lomita, California June 2020

Primeau Consulting Group (PCG) has announced the development of its Information Governance (IG) Assessment and Consulting Services to help healthcare organizations make better decisions by assessing data and information, identifying sensitive information assets and developing a governance program to align with its strategic goals. The IG Assessment is powered by its partnership with CompliancePro Solutions™, a Columbus, Ohio based software and services company that provides solutions to address patient privacy and security.

“We welcome the opportunity to partner with another company that cares as deeply about information and data integrity as we do,” said Debra Primeau, President of Primeau Consulting Group. “This partnership will allow Primeau Consulting Group's clients to have the tools, software and services to clearly align their IG initiatives with their strategic goals.”

“The partnership with Primeau Consulting Group allows CompliancePro Solutions to add the talent and experience of Primeau Consulting Group consultants and provide a more complete solution,” stated Kelly McLendon, CompliancePro Solutions Managing Director. “With this expansion of services and products into the Information Governance area Primeau Consulting and ourselves are capable of managing with state-of-the-art services and products that address the rising needs for Information Governance as privacy laws like CCPA and GDPR change and become more reliant upon effective governance to be able to investigate, catalog and control data assets and their governance throughout any sized organization. We are excited to be expanding into this area with a company like Primeau Consulting. .”

About Primeau Consulting Group

Primeau Consulting Group is a privately held, women's owned certified full-service healthcare consulting firm based out of Lomita, California. Primeau Consulting Group has assisted with the selection, design, build, implementation, and project management of healthcare IT systems, HIM Services, Revenue Cycle projects, and IG assessments in facilities across the country.
